📄 PROFILE

Computer Science student at UEM Jaipur specializing in Frontend Development with expertise in React.js, JavaScript, and UI/UX design. Skilled in building responsive, user-friendly web applications with a focus on API integration, data visualization, and performance optimization. Possess hands-on experience in full-stack development (Node.js, Express.js, MongoDB) and cloud deployment (Firebase, Vercel). Seeking opportunities to apply technical expertise in modern frontend frameworks and scalable design to deliver impactful digital solutions.

🎓 EDUCATION

University Of Engineering & Management B.TECH CSE	CGPA - 7.76	08/2022 – present Jaipur, India
Joypur High School (HS) 12th Standard	Score - 90.2%	07/2020 – 03/2022 Joypur, India
Joypur High School (HS) 10th Standard	Score - 83%	06/2019 – 03/2020 Joypur, India

🧠 SKILLS

Programming Languages:

- Java, JavaScript (ES6+), HTML5, CSS3, TypeScript

Front End

- React.js, Tailwind CSS

Backend Frameworks

- Node.js, Express.js, REST API

UI/UX Tools

- Figma, Canva

Version Controller & Code Editor

- Git, GitHub, VS Code

Database

- MongoDB, SQL

Cloud & Deployment

- Firebase, Vercel

ERP Technology

- NetSuite

📁 PROJECTS

Kissan Helper 🔗 • React.JS , Tailwind CSS • Developed a digital platform that centralizes agricultural services for Indian farmers, enhancing accessibility. • Integrated key features such as soil testing reports, crop selection recommendations, treatment guidance, and real-time agricultural news, empowering farmers with data-driven decision-making tools. • Implemented a leaf disease detection feature with 85%+ accuracy through the use of image classification.	03/2025 – present
GitHub Profile Analyzer 🔗 • React.js, Tailwind CSS, GitHub API • Created a web tool analyzing GitHub profiles with insights on repositories, top languages & contributions. • Implemented interactive data visualizations using React.js and Chart.js/Recharts, enabling users to analyze GitHub profile trends and repository insights more effectively. • Generated fully responsive UI that improved mobile compatibility and accessibility across 20+ device types.	07/2025 – 08/2025
Ai Agent 🔗 • React.JS, Tailwind CSS, Gemini API • Built an AI-powered web app using Gemini API and Weather API for real-time intelligent interactions. • Developed a responsive UI with React and styled with Tailwind CSS for smooth user experience.	07/2025 – present

📁 INTERSHIPS

HONNOIX INDIA 🔗 Trainee	11/2024 – 03/2025 Remote
• Completed a 16-week industry training on 6G technology, including intelligent surfaces and THz communications. • Analyzed 3+ potential real world applications of next-gen wireless systems in IoT and smart infrastructure.	
Chetu Inc. Trainee (NetSuite)	12/2025 – 03/2026 Noida, Sector-62
• Worked on customizing forms, records, and dashboards to improve business process efficiency.	

- Gained hands-on experience in developing scripts (SuiteScript 2.x) and integrating NetSuite with external systems.
- Analyzed and implemented 2+ real-world use cases related to ERP solutions in business operations.

AWARDS

Ace Hack 4.0

03/2025

Hackathon Participant

- Secured 16th rank out of 500+ teams at *Ace Hack 4.0 Hackathon* (03/2025).
- Delivered multiple academic & self-projects with focus on scalability and real-world application prototype within 36 hours, applying frontend & backend skills.
